

Interactive Table Sketch - a festival installation

(low fidelity) circular version

Rotating playhead sweeps clockwise and any token it passes triggers a note

Each different token is a different instrument e.g. square = bass, triangle = vocals, circle = percussion

Center dial sets the overall tempo and start/stops the song

Each ring track taken position and feeds the song engine.

Concentric circle rings register the pitch water ring is bass inward active rises

Increments around rings to change timing
