

Interactive Table Sketch - a festival installation (low fidelity) circular version

Concentric circle rings
register the pitch
outer ring is bass
inward octave rises

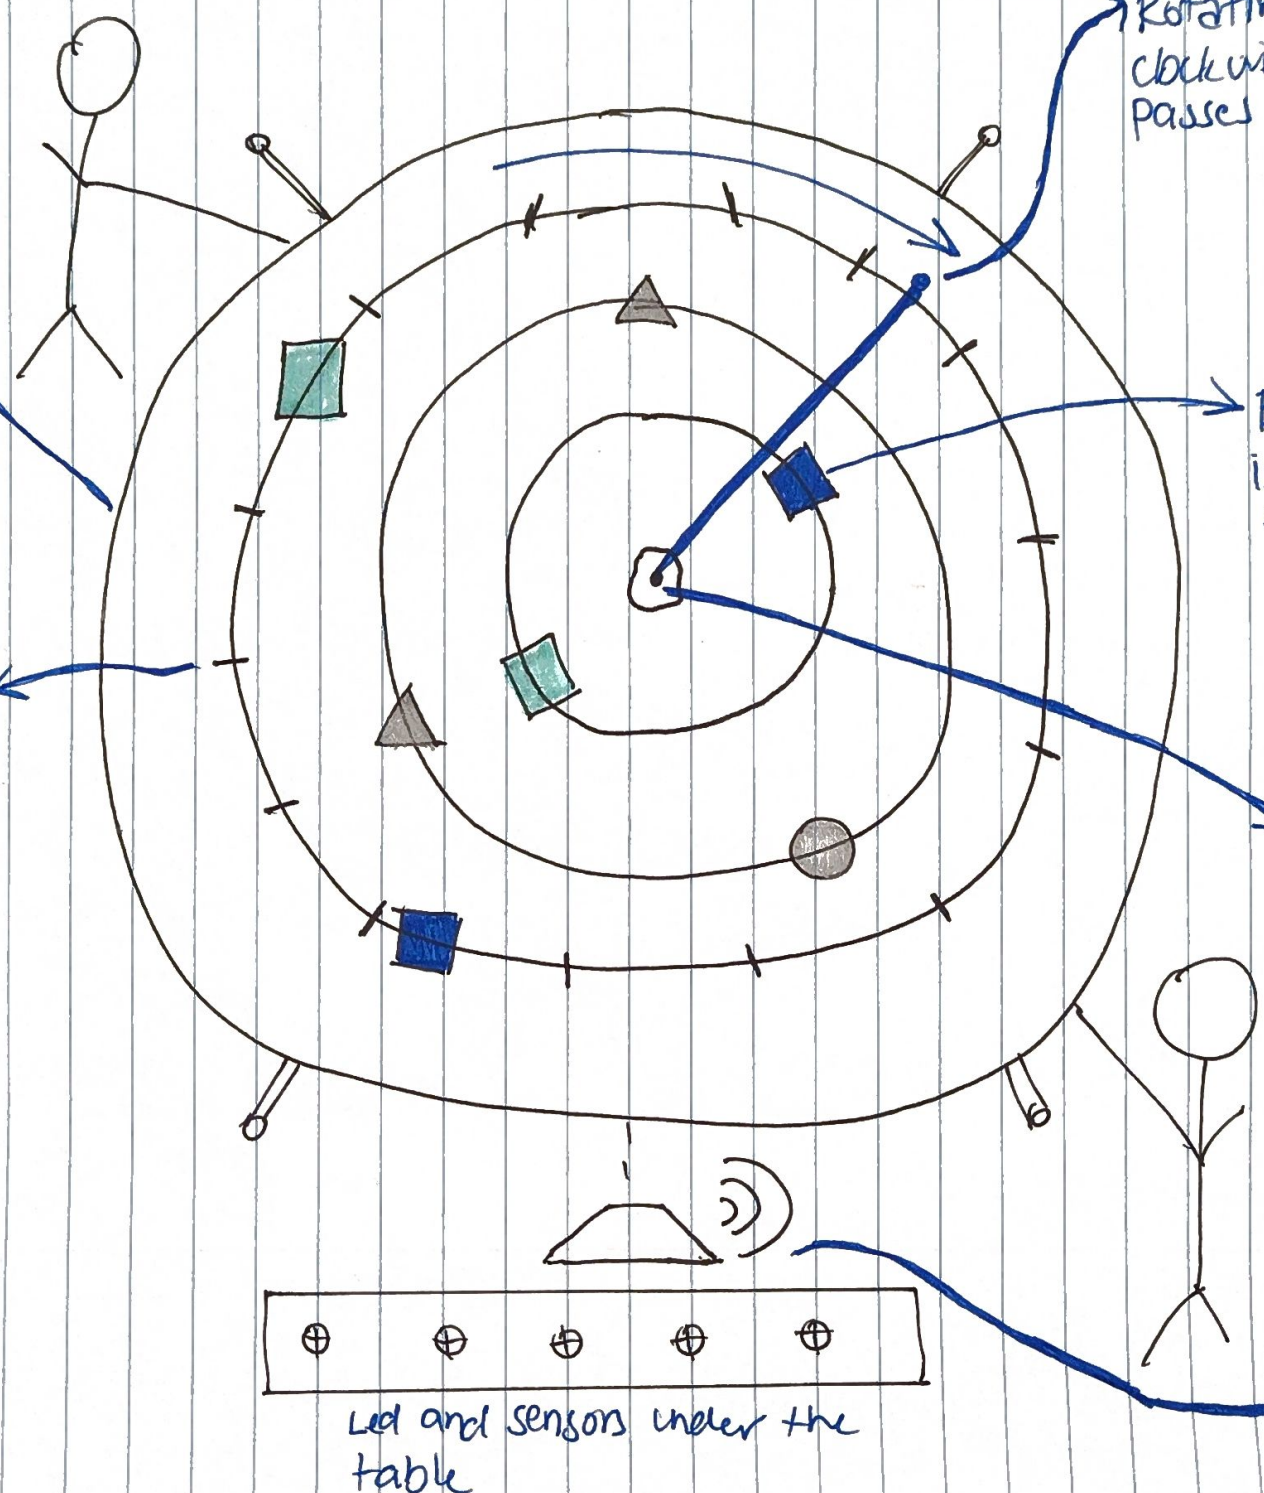

Rotating playhead sweeps
clockwise and any token it
passes triggers a note

Each different token
is a different instrument
e.g square = bass,
triangle = vocals
circle = percussion

Increments around
rings to change timing

Center dial sets
the overall tempo
and start/stops
the song

Each ring track token
position and feel the
same engine.

Led and sensors under the
table
